Re-Open the Maryborough Municipal Olympic Swimming Pool Complex

The Outdoor Pool has now been closed for FOUR summers. That's four summers that the local community and especially the younger generation, has not been able to cool off and stay connected on long hot Australian summer days at our Heritage Pool precinct.

The Maryborough council has known since April 2018 that there was work needing to be done. There was a 121page report done outlining a Conservation Management Plan for the Maryborough Municipal Olympic Swimming Pool Complex. But what if any of it has been done.

That's eight years including four summers closed to where we are now. A new three phase program which has been put forward still has us without a pool of any kind for at least another two more summers. And probably another two summers until the Olympic pool, our iconic 50meter pool, whose repair is why the complex was closed, to be open again.

Join us by signing the petition to let the local, State and Federal Governments know it's time to get their act together, get the funding approved and the project completed so we can enjoy our pool as a community on hot summer days again.

Thank you for your support
